

THOSE WHO ARE CREATED FOR WOMEN ARE THE CONDITIONS AND PROVIDE THEM WITH WORK

Naim Oblomurodov Khalimovich

Doctor of Historical Sciences, Professor,
Tashkent Financial Institute, Uzbekistan

Annotation

Attitude to a woman is the main criterion for the manifestation of respect for a nation, state, tomorrow and the future generation. In recent years, a system has been created in our country to ensure gender equality in society on the issue of women, to improve suitable working and living conditions for our women, to ensure that young people fully demonstrate their knowledge and potential. In particular, in the current pandemic period, more attention is paid to the effect of work on this than ever before. In this article, opinions and comments will be made on the conditions created for women and their employment.

Keywords: women's, employment promotion, employment, opportunities, new Uzbekistan, development, craft, mono centers.

Introduction

In unemployed young people and women, which will be included in the youth book and “women's book”, motivation will be aroused and professional skills will be formed. On the issue of women and youth, which provides the future of the country, a solution to problems is achieved on the basis of completely new, modern work methods that meet the requirements. This, in turn, creates opportunities for increasing the activity of women and young people in the socio-political life of society, further strengthening their social protection system, full demonstration of their achievements and potential in all spheres of society and state Life.

The fact that girls get a good education, have a profession is one of the issues that our president always thinks about. At this meeting, historical decisions were also taken to expand the educational conditions for them. In particular, the women's Education Support Program for 2022-2026 will be developed. Within the framework of the program, a separate university in the textile sector will be established in the capital on the basis of public-private partnership, mainly for the training of women. In places with the participation of cotton-textile and pillage clusters, the technical facilities of the University are also opened. Starting from the new academic year, to pay for educational contracts, girls will be offered an interest-free loan for a period of 7 years

in the first half. To do this, banks will allocate 1 trillion 800 billion sums and 8 trillion sums in the next five years.

It is known that the word “new” has a special significance for us. At the beginning of the last century, we all know very well that Our Patriots, Patriots of the nation, flagged the ideas of “acceleration”, that is, renewal and freedom, justice and equality, knowledge and self-awareness, and bravely emerged in the field of struggle. The purpose of these great beings was to arm the people of Turkestan with secular science, advanced professions, remaining in the swirl of ignorance and backwardness and lead them to the path of universal development. The new schools, theaters, libraries and museums, newspapers and magazines, charitable societies established with the aim of sending the Children of Turkestan to study abroad, organized by the jadids, aroused our people from centuries-old ignorance and gave an invaluable power to the National Liberation Movement. To some extent, the so-called New Uzbekistan covers almost all spheres and sectors in our country, we can say perfectly that the situation is the debacle of a huge goal for major changes and updates.

The formation of a culture of equality of women and men is a systematic and continuous process that requires cooperation with the general public and civil institutions. In this regard, the joint and co - operation of all spheres of society-state structures, public organizations, business entities, trade unions and broad population strata-plays an important role. The organization of the targeted activities of all layers of society requires the creation of the necessary gender-de-educated information base, gender analysis and monitoring of the gender situation at the level of all regions.

In this sense, we will not be mistaken if we say that such great ancestors, in general, are embodied in the dreams and harmonies of our great-grandfathers, who founded the first and second periods of awakening in our national history in the time of the idea of “New Uzbekistan”, which has taken a deep place in the hearts of all our people and is The history of mankind shows that the processes of spiritual awakening in the life of any people lead to the realization of national identity and raise the economic, cultural development of the country to a new level.

Another innovation: from the next academic year, the contract money of girls studying at the magistracy will be covered from the full budget. Also, representatives of the needy family, the education contract of student girls who lost their father or mother, are paid from the local budget. In order to significantly increase the share of scientists in our society, in the direction of doctoral studies, women are allocated a target quota of at least 300 per year. Instructions were given on the establishment of Centers for the evaluation of qualifications at mono centers and universities, training of women in high-demand working professions. For 2022-2024-ies, the adoption of the

program “Business Women” was established. A total of 8 trillion sums will be allocated to his performance. For women, entrepreneurial courses are organized, preferential loans are provided. The head of our state stressed the need to support entrepreneurs who have provided employment for needy women. For them, a lot of tax and trade benefits were established.

Indeed, today, women and young people make up a large part of the population in our country. As a result, most social issues are resolved with the participation of representatives of these two layers. Therefore, in these two directions, a vertical system is being created in Uzbekistan, which maintains state policy to the level of the neighborhood. Today, in order to increase the activity of women and young people in the society and to eliminate the problems and obstacles faced by them, the head of our state has a special place in each district on the issues of youth for the formation of the “youth book” and “women's book”, its specialist up to 3 persons, 3 employees of the Department of On women's issues, each neighborhood has a separate chairman's seat, the district – the head of the neighborhood and family Department and 2 specialists, and the region-up to 8 staff units.

Conclusion

Now, new approaches and approaches are also widely used in the effectiveness of work. That is, sector leaders and representatives of responsible agencies were also given clear instructions and instructions on studying the situation in each neighborhood, communicating with young people and women one by one, identifying their needs, interests.
