

THE BEHAVIORS OF CHILDREN IN THE FAMILY AND ITS FORMATION

Atamurodova J.

Teacher of Jizzakh State Pedagogical Institute

Annotation

The article talks about the role of parents in family education and the state of children. Local literature was used to cover the topic of the article.

Keywords: Family, children, morals, upbringing, character, attitude reflects tradition.

Introduction

The expected results can be achieved only if the family upbringing is inextricably linked with social upbringing. Achievement of achievements in family education is also connected with the possession of pedagogical knowledge of parents, exchange of experience in Family Education, intense involvement of parents in educational work. Every parent should have a deep understanding of their duties and responsibilities in the upbringing of the family.

One of the important aspects of national moral values of the family. Our people come the holy family is very ancient. Moral norms and religious norms of family relationship which is the basis formed from ago. Most of the norms of conduct and ethics which is now available most importantly

family. Despite expressing only the relationship between husband and wife family ethics to remain, but as a mature man of initial and development of children is the main criteria. Consequently, spiritual wealth, pure and physically healthy care for the upbringing of children delivery is carried out initially in the family. A human life that accompany the human qualities – kindness, goodness, active within the creative, selfless devotion, courage and family. Temurids family traditions and their history, according to the wise nurturing of children from come enjoy national and elegance. For example, Abdulla Kadiri of the “last days” that have been the main protagonist in the novel, actions, words-translate words, mad circulation up to grace, not kindness, hospitality, not believe, not religion as a hard-working national human qualities of temurids in the family occurs. The age of the ethics of the family-well-mannered, honest, hard-working, to be honest, to be an adult prepares the ground. Family education plays an important role in the future of children who be reached. “High spirituality – invincible power” as noted in the game, “as it is known, the people of Uzbekistan from the beginning of his kid's ministry with stand out. Of course, the children put to the mercy of their snow that had dark, but with their own way to bora, but our kids start young national education ethics-ethics, on the basis of high spirituality, we bring you up to date constantly to the role. Some parents pay attention to this issue not only, but also for the entire society can be seen in the example of too many that fall into a very expensive life.

Self-evidently, the above mentioned, as it was in the education of children, no one can deny that the issue of healthy children also play an important

role. Every man means well demonstrates intelligence, common sense, there's life in this bright world, family is there. Unless the family has children, the so-called priceless blessings are there. Since there are children, live with humanity and aspiration dreams are always noble. The happiness of our children today who make our work-all of them are carried out for the bright future. But the happiness only of wealth, goods and property will not be assigned. Well-mannered and knowledgeable, smart, hard-working, faith-belief of parents not only the children, but today it is the most valuable asset of society". There fore, the children in the family, society, the nation will see the image of the environment on its nature, the appearance and popularity and is the form of national ethical outlook finds. The children in the family for healthy social-spiritual environment is the source of national and universal ethical values. In the years of independence moral conduct paid special attention to the qualities in the family to find their identities. 1998 "year of the family" and should be declared in the current period on the government to take care of our decisions and events suggest that young families. Family understand each other each family member by the appearance of spiritual ethics. The glory and honor of the family of family ethics, pride, and the duties and functions which shows the criteria. The feeling of going to be shaped in family genealogy and proud of it – ultimately caused by patriotism, the like hood of democratic boasts brings. I.A. Karimov as noted, "...“degeneration” feels like there is a connection between how the word is divine. Of course, every servant, to provision-is most high. a man to be whole and complete in this life of food but the he also genuinely be committed, nurturing environment

is of great importance in children healthy should never forget that.” Oriental values, family ethics in Uzbekistan based on your own personal well-being tall, keeping the lower than the honour of the family, neighbors’ and close to the people, the first to be put in place to take care of neighbors – values at the highest level, if that makes solid contact with the environment outside the family and to provide a service. The moral and spiritual state of the family about how rich and thoughtful, and also the society is so rich spiritual education of society in the moral universe of the family will not find. The uniqueness of a certain nation, the nation as also his spiritual mode is representing. The ethics of the family – the national-all the symptoms of a mirror, representing the national foundation of marriage. Our country free from the formation of high spiritual aspects of family ethics and prosperous country, is a guarantee of building a free and prosperous society.

"People think it's easy to spend money" that long. What is necessary to exactly the same day in the money yourself, your family spend the most benefit is not easy. To consider this particular is a complex process that requires knowledge and the will.

Many the coming year we planned costs standing look to the next period for a month? Of course not. The unplanned but the family will not be and should not be economic.

No of dahir not economical. Good thinking spending cash to buy provisions, the rational management of resources, food items in accordance with the purpose of the use and care of the product means. Trying to keep in good

condition any income items in around for a long time. Clothes in their time sewing, home-the proper use of household items, extend the term of their integrity. Let the bible be the boss in our country and our families own neighborhood so genuine.

The people of our country to solve the tasks of enthusiasm and vigor with excellent society was entered. "The minds of all members of society and culture stand at the highest level of labor productivity due to set out the rules of social relationships and the development of living will not be achieved. How high are the members of the society of their creative activity and how extensive is full of multiplication, we can "law on education" at specified tasks quickly and successfully implemented stir".

Labor-human goal-oriented activity is the basic condition of life. Implements human labor due to his material and spiritual needs.

Human himself while a worker is due to his talent, ability, is the manifestation of the disabled. The expansion of the labor process in the person's worldview, the level of knowledge increased, self-will go from the form of the physical and spiritual aspects. This can take a few everyone he or profession or professional. "A professional can also forty little guy" in the content of the life of saying a few are pointing to the fact that the profession needs to master. Each of your profession, occupation and own specific flavor. The determination of his hard, unceasing research, I am overcome with patience it gets its flavor from man only. Of my youth, possessing a thorough professional, labor skills to the end of his life a man of pleasure is a guarantee of a lead in the quest. "A professional is not neglected land, is

not humbled to bread", "bread his whole", "foil without professional stream" (stream - ass). "I knew that, knowing the participation", "professional fruit trees a guy" like saying the provision also - suggesting that professional integrity is behind it. Professional so big, perennial rich, it also has to steal, destroy too, can't even burn.

They take in the family, young professional, hard-working, it is not necessary to be trained to follow the traditions of the disciples in the master make. It will not be seen because master in his work. They know the secret of professional is not perfect, not bad created the quality of the product will be in high demand. It's the children in the family or this is the first teacher in the master of professional parents. The child who has information about the initial occupation loved himself from his parents, of course, it is necessary to take the skillful masters of education from the same material. As our people say: "the disciples are seen thousands to the status of master".

Compared to the disciples of the master is a strict, demanding ministry, his understanding of the professional skillful stimulation or punishment plays an important role in the formation of the future owner. The disciples kindness rather than face-to-face to I put it trades subsequently. Therefore, the available knowledge at the master minds of the disciples with the patience to soak up after himself and continued managing his true disciples of occupation should try to produce.
