### Introduction

In today's fast-evolving era, science and technology are also booming growing. Progress in each area is taking a step forward. In particular, significant changes and significant achievements are being achieved in science. Each science is new using innovative technologies to help students.

Today, there are several different methods for the innovation of educational technologies It exists. They are used in a wide and varied coverage of the topic in lessons, the effectiveness of the lesson will be high, and students will be able to take part in the lesson there will also be an increase in interest. Importing news into the educational process higher efficiency of education. Foreign language use of various role-playing, moving games in teaching lessons and in the lesson, there is an increasing interest in language learning. Pairs of students or and by working in subgroups of students with others helps communication communications

Foreign language teaching in our country, knowledge of foreign language teachers and in accordance with the Recommendations of the European Framework for Assessment of Skills (CEFR) new methods and requirements have been developed. According to him, secondary schools and textbooks have been created for students of professional colleges. Meets these requirements classrooms with stands and new information and communication techniques equipped. The demand for learning a foreign language is growing day by day. Foreign language science is divided into four aspects (reading, reading, listening and speaking). each is given a separate understanding and skills.

Education technology, which is more effective than modern information technology in the educational process is to use. It is also a modern innovation in the educational process to improve the quality and effectiveness of education through the introduction of technology holds. In particular, such information and communication in the study of a foreign language there are several advantages to using technology. Language learning and the role of modern technology in teaching is invaluable. From technological means use every aspect of foreign language learning (reading, writing, listening comprehension and speaking). For example, to understand listening, of course, a computer, player,

This process is not possible without CDs. Listening comprehension language is one of the most important parts of learning. The student is at the same time pronunciation of the speaker, adherence to grammatical rules, vocabulary and its are required to pay attention to the meanings. Modern in the educational process Students also use information and communication technologies a good knowledge of technology and the ability to use it is an important factor. Teaching and learning a foreign language using modern technology is the best is one of the best methods

In this process, including:

- Reader foreign language video rollers when using computers, can also hear shows, dialogues, movies or cartoons possible;
- Listen and watch foreign language radio broadcasts and television programs can be made; – from tape recorders and cassettes, which is considered a much more traditional method use;
- CD players can be used. The use of these technical tools the process by which students learn a foreign language is more intense and more effective ensures that there will be [1].

Today it is a tradition to pass lessons through interactive games in schools it is becoming. As you know, the passage of the lesson on the basis of various games demonstrate the capabilities of students, concentrate, acquire knowledge and improve your skills and ensure that you are strong.

The basis of the use of gaming technology is to enable the reader and it constitutes an accelerating activity. Psychologists note that the game psychosocial phenomena of activity manifest itself in a person, in life find a stable position, perform self-management own opportunities relies on the fundamental needs of the increase. General in any game time the principles of the received education, the tactics should lie. Training for educational games the predicate should be taken as a basis. In the process of games, the reader will learn a simple lesson it is more interested in training

than in training and provides comfortable activities. It should be noted that the game is the masterly, a way of teaching.
