Uzbekistan Berdakh Karakalpak State University

Anotatsiya

This scientific report analyzes the work of the first President of the Republic of Uzbekistan IA Karimov High spirituality and invincibility, its role in the spiritual life of our state and society.

The book of the First President of the Republic of Uzbekistan Islam Karimov "High spirituality - invincible power" is undoubtedly one of such rare and exemplary books. The general structure of the book, its meaning, is written for a wide range of readers.

High spirituality - invincible power

"The future of our country, the future of our people, the prestige of our country in the world community, first of all, depends on how our children grow up, grow up and become human beings. We must never forget such a sharp truth. "

Islam Karimov

Today we live in a time when our people have set noble and great goals, live in peace, relying primarily on their own strength and capabilities, and achieve great results in building a democratic state and civil society. .

"Think for yourself, dear friends, who were we during the dictatorial regime, the colonial era?

- Whose slave was our destiny and will? "Where did we worship the Kaaba?" Whom did we wake up to every morning to the sound of the hymn "Peace!"

- What was the state of our language and religion? Did Imam Bukhari, Imam Termezi, Hoja Bahauddin pay attention to the sacred lands of Nakshbands? In what lands did the great names of Amir Temur, Babur Mirzo and other great ancestors meet?

- What concepts have changed our national pride, human dignity and traditions? "So what about us?" Did we know ourselves? What a noble land, would we realize that we are the children of a nation nourished by the immortal heritage of our great ancestors? Tell me, did anyone in the world know Uzbekistan at that time? Did anyone reckon with us? - Which of us knew what and how much our country is a treasure trove of incomparable riches?

"Cotton, which is supposed to be a source of national pride, is in fact a yoke instead of national pride.

Indeed, this is what our people have experienced in recent history we have no right to forget the sufferings, the miserable days when our destiny is on the brink.

At the same time, it is impossible not to mention the work of the First President Islam Karimov "High spirituality - invincible power."

There are books in the world that first of all affect the human mind, provide a lot of knowledge, ideas and information, play an important role in expanding the worldview, thinking. There are other books that, first of all, affect a person's heart, the world of emotions, serve to nurture his feelings, open the eyes of the soul. At the same time, there will be unique and valuable works in all respects, which combine the features of all these books. They have an equal effect on our minds and spirits, and with their enlightening power both enlighten our minds and enlighten our hearts, changing the views of not only one person, but of the whole society, and giving them a beautiful and unique spirituality. causes the formation of qualities.

Undoubtedly, the book of the First President of the Republic of Uzbekistan Islam Karimov "High spirituality - invincible power" is one of such rare and exemplary books. "At the same time, the topic covered in it, the problems and issues raised, the object of research, in terms of scientific and theoretical features is very comprehensive, complex and multifaceted, but at the same time very unique. can be seen in examples "[1,68]. First of all, it should be noted that the phenomenon of spirituality, which covers not only the inner world of man, but also the socio-political activities of society and state life, his personal lifestyle, actions and aspirations, is still deep and fundamental in science. basically illuminated and not studied. It is well known that in the East and in the West, the state or society, the just ruler, the people and the nation, the transience of the world and the eternity of the soul, about man, the economy, philosophy, culture, literature and art. many fundamental works have been created on issues directly related to the destiny of mankind. But it is true that we have not yet created a perfect work that comprehensively studies the phenomenon of spirituality from a secular point of view, both scientifically and practically. Speaking of which, it has been pointed out that there are a number of socio-historical, scientific-theoretical reasons for this. Why is the book "High Spirituality - Invincible Power" so called? Why is it called spirituality, not modern weapons, material or financial resources? Looking around, some countries are hydrocarbons. We see that the world's leading countries are trying to increase their economic performance by increasing their wax income from the sale of raw materials or other minerals. Or a number of other countries are trying to demonstrate their power by using military force. This book argues that spirituality is more powerful than such factors, because material and

financial resources can enhance technical and technological capabilities. But spirituality gives incomparable strength to a person who is the creator and creator of such techniques and technologies. He is the power that sustains man not only in his body, but in every part, in the defense of goodness turns the horse into a force.

Of course, in today's world of technological development, both material and financial resources and military power are needed, and no one denies this. In this regard, Uzbekistan is no less than anyone. But what is needed first of all to mobilize this technical and technological potential in the interests of the people and the Motherland, in the path of humanity? First of all, we need intellectual potential, modern knowledge and experience, will and determination, in short, spirituality.

Because our first President IA Karimov has repeatedly stated in every speech and speech, article and work that high spirituality is the foundation of the future. "We assess the development of our society not only in terms of economic and social well-being, but also in terms of the spiritual integrity of our people, how deeply rooted in the minds of people are the principles of democracy and humanity," Islam Karimov said.

In particular, the book's definition of spirituality is very deep and detailed: the incomparable power that makes the whole, awakens the conscience, is the criterion of all his views. "

Is it possible to overcome a person with a pure soul, strong will, whole faith, and a clear conscience? What about an entire nation with such qualities? Aslo. Therefore, the author sees in the image of spirituality an invincible source of power for man, society and the state, and proves this view on a scientific and philosophical basis.

Naturally, such books will not be created in a year or two, which will define the strategic directions of socio-spiritual development of an entire nation or country, the current goals and objectives in this area, and highlight the signs and characteristics of man and his spiritual world. Such works, which are unique in their meaning, subject matter, and scope of issues raised, are unique not only to the author, but also to the vital, socio-political life of the people and nation to which he belongs. their experiences are undoubtedly created on the basis of an analysis of what is happening in the world. In this regard, the author's remarks in the introduction to the book about the 5 important factors that led to his birth are noteworthy.

Firstly, the book shows how influential and important the spiritual world is in the ascension of man;

Secondly, to think comprehensively about the real danger of attacks against spirituality;

Thirdly, to warn people of such dangers in the current complex and dangerous time when our people are building the foundations of a new life, a new society;

Fourthly, our country, the general public should once again draw attention to these issues;

Fifthly, it was born as a product of the vital need to clearly define the tasks related to the spiritual upbringing of our future generation..

This work contains a number of new ideas and views on the spiritual development of our people. But the idea that the future of a nation, a society depends on its spirituality, determines the main direction and content of the book as a central idea. It is well known that during the old regime, there was an inhuman attitude towards us, "You don't think, others think for you, you know your cotton". The eyes of our people were blindfolded, their minds and spirits were addicted. Now we have the right to decide for ourselves, to implement ourselves, to build our own lives with our own minds, strengths and abilities, to pursue independent policies. At the same time, we are responsible for such glorious deeds. Naturally, such a free and free life, such opportunities have awakened the power that has been dormant in the body of our people, passing through several ancestors. Our 22 years of development can be a clear proof of this.

In short, the book is the product of the author's many years of observations, thoughts and reflections, based on a comprehensive in-depth scientific and vital views, and consists of four chapters, its laws and categories of spirituality, concepts and principles are analyzed as a holistic system. It can be said that on this basis a comprehensive scientific-philosophical, theoretical and methodological doctrine of the essence of spirituality, its role and importance in the development of man and society, nation and state has been created.

Another noteworthy aspect is that the issues raised in the book, the ideas and views put forward, the opinions and conclusions expressed on various issues are universal and specific not only to one nation, society or state, but to all mankind. 'based on the principles of rikenglik. The fact that the concept of spirituality and the issues related to it have been described as a global problem common to all peoples and regions of the world also confirms this idea.

In today's turbulent times, only a truly spiritual and enlightened person can selflessly strive to know human dignity, to understand their national values, national identity, to live in a free and independent world, to take a worthy place in the world community of our independent state. can take.

Not only the head of state, first of all, as a child of our people, who has a great history, culture and spirituality, but also as a person who cares about preserving this priceless wealth and protecting it from various overt and covert attacks. It is natural that these important and very sensitive issues are of concern to everyone living in our country.

This book is a comprehensive reflection on the impact and importance of the spiritual world on human development, as well as the real dangers of attacks on spirituality, to warn people of such dangers in today's complex and dangerous world, where our people are building a new life, a new society. , our country was born as a vital need to once again draw the attention of the general public to these issues, to clearly define the tasks related to the upbringing of the next generation in a spiritually healthy and harmonious way. As the head of state said, what should be done today to preserve our spirituality and what to do against the attacks that threaten it? I would say that it would be necessary for our culture to deepen its understanding of the heritage of our great ancestors, to think consciously about the rapidly changing realities of life today, to think independently and to live with a sense of involvement in all changes in our country. A nation with such unique human qualities and high spirituality will never depend on anyone, it will surely achieve its noble goals.
