

CAREGIVERS IN THE SYSTEM OF HIGHER EDUCATION THAT CREATIVE POTENTIAL DEVELOPMENT OPTIONS

Dilafruz Asqarova Ibroximovna

Social and Humanitarian Sciences Fardu Teacher of the Department

Abstract

In this article referred to potential caregivers in the development of creative thinking. Development of creative potential of the main caregivers in the formation of the quality of creative work to see a clear priority on the basis of the principle of goal-oriented thinking and find innovative approach highlighting the effectiveness of the decision was to conduct offbeat activity. The creative potential of caregivers improvementat giving many suggestions to organize sessions than mentioned.

Keywords: caregivers, the principle of the creative classes, teaching activities, abilities.

INTRODUCTION

Reflect the real world conditions and opportunities in the education system creative development of research on innovative pedagogical practice are introduced. This potential caregivers in the future, the quality of creative and artistic-pedagogic activity for the effective development of skills and professional development in social work is being carried out systematically on their creative activities.

The future of the world's innovative approach to their creative development in the education system on the basis of caregivers, the quality of future teachers in the creative, positive-pedagogical activity in the development of creative skills to support the development of new pedagogical tools that initiative, socio-cultural and creative activities, conducts research on the development of effective organization skills. Development of creative potential of the main caregivers in the formation of the quality of creative work on the basis of the principle of priority to see a clear goal-oriented approach and innovative thinking activity the effectiveness of the decision to conduct paid special attention to find offbeat. Also, the creative process in the development of their caregivers could receive potential price salohiyatlarini knowledge, conducts research to identify creative opportunities. Sh.As noted in the reference to assign at oliy majlis the republic “in recent years, the improvement of the content and processes of higher education based on advanced foreign experience, qualified personnel, potential caregivers is the creation of a normative basis in the

creative development. Now the development of analytical and creative abilities which serve young people in the creative industry, we have to give a lesson ”.

Material and Method

The growth potential caregivers of the thought of one of the main factors of his creative thinking, creative development iyerarxik primarily for computer knowledge, free thoughts to describe offbeat thinking skills it is necessary shakllantirmog'i. Creative it apply to every area; area exactly the same things that experts will identify useful to knew the news. How high the level required in each area, it also is so high that is creative. Creative specific to each person, but people will lose the effects of different factors in the development of or vice versa. Creative acumen than for the development of problems in harmony, the search for answers and solutions, to put forward the hypothesis of them, including check and summarizing the results should teach.

We are expounding about creative first of all, think about the creative concept. The terms of the creative 1922 by american scientists to be included in science, (lot. “creation” –active within the creative, creativity) - how is new, create something unique, get disabled, and artistic form, creating, thinking, the mental process, which lead to ideas and solutions, and to characterize the person's willingness to accept new ideas create creative ability. The ability to generate it to create new understanding and new skills of the person, a trait that is it means.

Earlier in boosting creative thinking skills potential caregivers in the formation of this concept should be in them. The concept for the formation of creative potential of caregivers in the room while a comfortable environment to be created in the education process is based on the development of critical and creative thinking ability which is of great importance. The creative environment of creative thought proper to be able to tashkillanganligi the ground creates potential caregivers.

Xaygns their look h. ” full-fledged creative nature to create a learning environment well-thought-out plan is based on. Teachers, of their teaching method (efficiency, effectiveness, productivity issues, a wide range of thinking and creative thinking) achieve high results, the potential determines the quality of tests that determine the use of personal experiences and caregivers” will recommend to.

Result and Discussion

creative potential caregivers in the development process in the system of higher education, critical thinking, logical thinking and the development of a non-standard way by way of a solution to the problem is carried out. Alan Uolker[37]'s “*critical thinking by example*” (i.e., through the example of critical thinking) are noted in the

book noted the formation of potential caregivers will cover several processes in critical thinking. Of them; the idea on the assessment of down, to determine the basis, proof, or evidence bug holding meetings to identify additional evidence of impact assessment, identify assumptions, identify conclusions the main conclusions of the synthesis.

For the purpose of development of creative potential caregivers into a pair of learning materials designed to describe the content of the program, referred to as the type of didactic training activities in accordance with established goals and requirements. In other words, the potential of caregivers knowledge, skills, and armed with creative thinking skills, and training in the major part of it is a form of education who has played or the type of occupation that constitute.

Creative caregivers of potential improvement at the organization was chosen as the acceptable way of training in relation to the following requirements:

1. The purpose of training functions and caregivers on the development of creative potential pedagogical accuracy and correct in all respects;
2. Creative potential of caregivers rendered the development of the information sessions, the methodology, nurturing, joy, and unity of the functions of competition that develops;
3. Holistic teaching and training in accordance with the content and functions of certain parts of his to come, future caregivers to know the line active, creative development the problematic situation of a non-standard way to find out the solution in the selection of appropriate skills and techniques which serve to provide independent activities;
4. Creative potential of caregivers various forms of training, which serve the development team, group and individual forms a basis acceptable to get added on the go;
5. The guidance of teachers with the task of potential caregivers to bring together creative thinking activities;
6. The discussion of training to be able to achieve a logical and mutually skillfully and innovative features;
7. Considering the psychological characteristics of caregivers and potential creative abilities;
8. The teaching and training of caregivers in nurturing potential, creation of favorable conditions for the process of creative thinking;
9. Training is not in the same mold, but, on the basis of principles hamfikrlik organization;

10. Potential for the development of creative educational activities of caregivers caregivers in future to ensure that the freedom to achieve.

CONCLUSION

In the development of knowledge in the process of training assignments in the form of qualifications and skills, creative development complex improvement of the opposite process. Studying various functions of learning materials, methods, ways and some of the innovative tools, as a result, many types of training different is the appearance of his style. Often such a method of teaching not only get new knowledge, but the knowledge obtained when it is required to be applied in practice are used. As future teachers, and caregivers to teach creative thinking to a number of along with also the modern requirements to the development main goal should be able to.

APPRECIATION

Therefore, future caregivers in the educational process and pedagogical conditions in the country as the reason that take creative development, creative thinking potential caregivers during educational activities will be improved. While these formed the basis of special knowledge on educational technologies development is carried out by teachers. Potential caregivers in the system of higher education that are in turn relied on rich experience and creative development of scientists from us is carried out without previous values. The creative development of potential caregivers and the use of special technology to achieve highly effective serves.
