ANNOTATSIYA

In this article, using innovative technologies in the educational process and the development of speech the word about the activity the students will go. In this article, the main purpose of education speech activity of the recipients of the tool in the further development of the activity of some resources that can give you information on topics wide and deep so that they can work on improving your approach on this basis and from the use of methods and technologies that are necessary for suggostopediyali to get skills and qualifications to form relations.

Keywords: suggostopediya a modern approach, interactive, innovation, motivation, interactive lessons.

INTRODUCTION

Advanced foreign experience of higher education in the republic of the content and the improvement of the training process based on spiritual and educational work of students in the speech and the culture of professional development as an important direction is given particular attention. Future professional activity of students at the same time to achieve fully realize the social significance of social responsibility commitments and requirements for professional pedagogical culture relationship find the decision paid particular attention to the mechanisms and improve capabilities. This view-point is currently in the process of education, interactive methods, and innovative pedagogical technologies which interest is to apply the day –to-day are increasing. Because the current representative in the information age every area of their profession secret-in the case of possessing their gadgets, they will enter it into a competition asrori healthy, and practical takes to achieve the end result. This process in the future and future activities of caregivers trained in the speech culture of high achievement in the development of methods foydalaninsh natijadorlikka suggostopediya speech guarantees.

Material and Method

The language in which students initially entered for the purpose of mastering these methods besides easy effective in improving the culture of speech is currently used. The teacher in this process, management, leadership, performs the function to education, nurturing and managing the interests of students will be directed to. Experiences in the field of education, testified that new pedagogical technologies, applying them in their place in the modern educational process quality has been recognized as taking out the necessary methods to the stage.

If one of suggestopediyali interactive methods approach, the use of methods suggestopediya one of the methods is somewhat complicated. These effective methods for the use of peaceful, quiet and relaxed group environment. The purpose of this method a second language to children the stress, fatigue and emotions without fear is to teach. Without nurturing himself comfortable sit .

The teacher put on music and pretty peaceful and quiet should create a harmonious environment.

“Suggestopediya” supporting the exercise techniques in the lesson: Students on the basis of the conclusion of the story the small size of the pictures can be used as exercise.

1. The teacher gets students comfortable quiet settles own music. Remember that music can be a walk in the garden or in the forest, I walked over to them.
2. The lamp is turned off, close your eyes for 2 minutes all of the students themselves, the birds, animals, trees, or flowers, as should imagine.
3. His pupils begin writing after that the small text.

But their role should not forget. What you need to imagine himself as if to protect the environment from the text writes about how those languages.

This method itself mean that to reach the students, the society which can be done by self-awareness, self-confidence and self-speaking to a method of improving the activity makes it possible.

Result and Discussions

The students to become familiar with the development of speech is not only the environment but also for overall mental development is also necessary. Oral speech in higher education, the aim of boosting the activity muvoftq be possessed norms of literary language without speech, active speech to provide access to briefly. Directly potential caregivers who enrolled in higher education will continue in the future activities of the organization of primary education. Pre-school education to achieve success in life which help in the organization of the child's future physical, mental and

spiritual ability in the process of knowing, we study the surrounding environment, speech, cultivation, artistic works, listen, draw a picture, build-made, complete type develops in physical exercise and other activities. The directions in this activity combination with each other - in the form of integrated planning and organized on the basis of the game is conducted in an interesting way. The game had come to fit babies natural needs and desires, for the reason that the game was repeated with the theme quvnoqlik in the process of learning, promotes the development with relief.

People in no other activity in the game himself as the type to forget his psycho-physiological and intellectual resources to reveal does not show. Russian writer Yu.Nagibin rank the importance of the children's game is as follows: " children in the game, their character, views on life, ideali appears . Children in difficult life approach to solve problems themselves without knowing the process of the game brings. Given that trained to use all of the opportunities in the educational process of using game activity you should try.

Nurturing a culture of communication, activities children of preschool age in the game and ability to work in team shape. The game is based on the effects of memory as a mechanism for easy memorizing. The psychological effects in the game are conscious that lead to the emptying of all things through suggestopediya are remembered, it will help you remember to keep emotional and interest.

The advantage of the game, it training not only the individual, but the pair, group and team work will also provide the form, this allows efficient use of training time.

Educational games and simulation approaches to the synthesis of a chain of conditions, including suggestopedik if the situation is controversial, then the participants themselves according to their goals, shall perform a given role.

In the imaginary world of the game play, to act in real life situations will help. This fear, anxiety and nurturing destroy self-confidence. Nurturing knowledge in a way not to feel they take of themselves and they do not feel forced. Such information creates the conditions for emotions to remember to stay calm .

Suggestopediyali practice to achieve the goals of achievement provides the following methods:

- the educational process and the pseudo-passive attitude, the first thing that gives them the motivation to perception - this intonatsiya. Intonatsiya to play with various interest, perception and allows you to achieve results;
- music to the perception of emotional material, but the rhythm of the music is not the same, should be different;
- group sessions should be changed depending on the subject to view. This does not mean that all things must change you, your background, your landscape can create.

Participate in the design of nurturing group before training is good. This "open secret" of all things in the eyes as they occur, but no one caregivers and how the story of "how they will be the actors of history" does not know.

The main task of caregivers - good mood, good preparation, self-confidence and peace of mind.

CONCLUSION

Based approach helps to overcome the psychological barrier and bringing up suggestopediya games to show itself to be the capacity of the person and the immediate encourages. In such circumstances, the games teaches you to be conscious during the process of pedagogical certificates and relaxation, along with the operational environment and not in the sense of force, the material is assimilated in a way she did not feel, at a high level will be remembered. Pre-school education to every activity in the game will head to caregivers. So caregivers along with the preschool children, parents tarbiyalayotgan every move, stand, walk, circulation, noble qualities in relationship with others will exhibit must know. Because children by nature is incredibly kuzatuvchan. A rough relationship in the family, lying, a lot of babysitting an unhealthy environment which produces unpleasant behavior will have a negative effect. Therefore the stability of the environment of the family hamki spiritual speech in the role of culture is very great. This in turn is important in how the civilized regions of the young. In this regard, "special attention should be given to restoration of national culture specific. At the same time the national self-consciousness the restoration of our society and our culture and traditions from the world humanitarian of human values can not remain separated from multinational ideali", - was noted that the i. a. Karimov.

ACKNOWLEDGEMENTS

Conclude, it can be noted that and spirituality, culture, education and culture, family, religion, science is in the form of heart. The policy came out, so I can say that the spirituality of society, the foundation of nurturing the potential to be one caregivers, speech culture, education and culture, family, religion, the influence of culture and science is of great importance.

Potential caregiversat suggestopediyali approach on the basis of the improvement of professional skills of personnel as one of the important indicators to prepare them competitiveto.

Approach Suggestopediyali o'educational and professional objectives in the mindset of them go looking for a new side will be strengthened. At the same time potential

caregivers new skills at builds. To solve creative tasks different educational and professional experience allow us to gather. It should be noted that often the number of groups trained in passivlik so much of the training material will be realized in the process of mastering and independent creative activity for bringing that up to be active in teaching methods that encourage the use of today's pressing need and has appeared as a need of the day.
