Annotation

This article provides detailed information on how to systematically improve the behavior and skills of each teacher in dealing with students, raising the level of activity of the class teacher in the pedagogical and psychological study of students. Relevant conclusions have been made on the basis of research in this area.

Keywords: ethics, pedagogy, skill, pedagogical-psychological study, systematical improvement.

It is very important for educational institutions and their educational process today socially significant tasks are set. That is why the younger generation to form a worldview, to strengthen it ideologically and politically, high to acquire moral character, to prepare them for labor and conscious choice of profession.

The role of the class teacher in the implementation and solution of these tasks is invaluable big. Because it is aimed at carrying out educational tasks in a classroom setting organizes and manages affairs. The class teacher in the educational institution is "universal educator". To do this, the activities, responsibilities and be aware of the requirements for them. Uzbekistan "We are talented and selfless," said the first president of the republic IA Karimov a wing for our children, for our children to reach the heights of knowledge and career

We have to give," he said. Knowledge is the foundation of our future that is, because the future of the country depends on the children that every parent, coach, teacher can see the person first in the image of each child necessary.

The educator seeks to integrate students into family and group behavior in order to provide students with an in-depth study of the activities of group activists to their self-governing societies, taking into account their interests combine, on a regular basis in the education of students, with their parents stay in touch

□ Health and living conditions of students by visiting their place of residence independent work and voluntary recreation, providing the necessary assistance to improve organize their releases

□ In addition, the activities of the group leader should be organized in a planned manner.

The activity of a class leader is focused on building a person's personality. The results of this activity are in the image of the pupil, in his personality reflected in their characteristics, character, and behavior. An educator is an educator the identity of the trainees in a place where it is not clear and clearly understood what they are striving for it is not a serious effort to improve, but an educational endeavor has a random character and takes only to fill the time allotted for it is carried out.

Therefore, it is necessary to clearly define the goals of educational activities. Snf leader his first job after admission to class is usually to study students related to This work has been going on throughout his classroom career continues and is an important aspect of his educational work system. Class teacher for pedagogical and psychological study of students should know:

- Study each student as an individual
- Organize classroom education
- Improving the knowledge and education of students and their discipline strengthen
- Organize and conduct extracurricular activities in the classroom
- Integration of educational work of science teachers
- Work with students' parents
- The class teacher should do a multifaceted job in relation to science teachers

The class teacher teaches students about natural life and learning activities. First of all, class the parents of the students in the class whose leader is hidden from them and those around them. It is important to study their relationship with Students daily both in lifestyle and in learning activities. Of course, the class teacher is involved in identifying, studying, and identifying students' behaviors and attitudes should work in collaboration with the psychologist of that institution.

Parents and neighborhood committees also play an important role in this. Educating children identification of factors, individual approach to the student, educational work proper organization, certain requirements for students in the education of students is achieved by If the class teacher doesn't know his students, he tells the students approach, make big mistakes in the choice of methods of pedagogical influence can put. That's why the class teacher is not about the students, but about the team it is also necessary to know the internal environment. In this case, the class leader

1. Always and in all cases take into account the individual characteristics of students it is necessary that an individual approach to students is a feature of each student not individual adaptation. It is first and foremost about the individuality of each student, of educating him, taking into account his personal experience actively seeking a more

effective way. In the process of educating students an individual approach to them rather than keeping each student in mind from knowing his characteristics, from relying on his positive qualities, in difficult situations for him from providing regular support and for her good behavior is to encourage.

2. To study students and make an educational impact on them, to study students it is not the end goal, but the necessary conditions for educating them. Student learning is a natural part of personal development with the participation, the content of the necessary spiritual qualities and character in students with the accumulation of organic matter. The class teacher is responsible for developing the positive qualities in the students' behavior and eliminating the negative ones "Designs".

3. Students should be taught in a planned and regular manner. Student its not one-and-a-half and random events in behavior it is necessary to study the typical features that are very common in the personality. With that in mind it is important to note that students are always evolving and at the same time their interests are also constantly changing. That's why it's only for students need to be taught to develop.

4. To study students in the context of natural life and work. Student education in the process should be involved in socially useful counseling and community service. Student teachers, student groups, parents and others It is necessary to study the relationship between It is the person in the relationship process will open more fully. Different methods and techniques can be used in learning. Conversations with parents also help the child learn.

5. Study students and get acquainted with their life and living conditions.

Ethical qualities of students, their achievements and shortcomings, education In the process, home conditions, the external environment is also taken into account. The teacher wants to study the whole personality of the child, not just the individual. The class teacher is responsible for the behavior of the student at different stages of the educational process may focus on exploring some aspects. The student is versatile to achieve the teaching, the program is well thought out in advance, the students it is necessary to choose a teaching plan, interview questions, essay topics.

In short, the student body is an independent organization, but it is pedagogical needs guidance. Leaving students alone, as well as children both administrative and command-oriented in relation to the community not allowed.

In the first case, the class teacher is completely out of touch with the students in the second case, he goes into a state of repression. destroys student independence. The main task of the class teacher, children skillful management of the team, the development of student initiative, is about building class team activism and independence. Team of students and community education is one of the most

important principles in the education system is one. About the team's leading role in shaping the student's personality ideas were expressed in the early development of the science of pedagogy. His in the team there is a special form of relationship between the members, which is the student ensures co-development with the community.
