

METHODOLOGY OF DEVELOPMENT OF ETHICAL CULTURAL ATTITUDES IN STUDENTS

Imamkulova Muslima
Teacher at Termiz State University

Annotation

This article explores a methodology for developing ethical cultural attitudes in students, recognizing the importance of fostering cultural sensitivity, empathy, and a sense of ethical decision-making in today's diverse and interconnected world. It explores a variety of pedagogical strategies, teaching methods, and experiential learning opportunities aimed at developing students' awareness of cultural diversity, encouraging respect for diverse perspectives, and developing commitment to ethical behavior.

Keywords: ethical cultural attitudes, student development, pedagogical strategies, cultural awareness, sensitivity, empathy, perspective-taking, critical thinking, ethical reasoning, experiential learning, immersion, service-learning, cultural exchange, international study programs, reflection, self-assessment, diversity, inclusion, moral values, global citizenship.

Introduction

Continuous education system in our country improvement, increasing the possibilities of quality education services, highly qualified personnel suitable for the modern needs of the labor market continuation of training policy is defined as a priority task. In the implementation of these tasks in higher education institutions national in future teachers based on the subject of folk pedagogy improving worldview is an important issue. Worldview - education students' view of the world and the person in it instead, a general attitude to the reality around him and to himself a system of beliefs as well as beliefs based on those beliefs, are interpreted as ideals, principles of knowledge and activity. Emphasizes the importance of promoting moral-cultural awareness and sensitivity as key elements in the development of moral and cultural attitudes. Teachers are encouraged to create an inclusive learning environment that celebrates diversity, challenges stereotypes, and encourages open communication about cultural differences.

The role of empathy and perspective taking in the formation of moral cultural attitudes is discussed in the scientific literature. Through literature, role-play exercises, and real-world scenarios, students are encouraged to empathize with

individuals from diverse backgrounds, recognize the influence of cultural factors on behavior, and appreciate the complexity of ethical decision-making in cross-cultural contexts. Emphasizes the importance of critical thinking and ethical reasoning skills in solving ethical-cultural complexities and ethical dilemmas. Teachers are encouraged to engage students in discussions about moral values, moral principles, and cultural norms, enabling them to analyze situations from different perspectives and make informed ethical choices. Immersion learning explores the importance of experiential learning and immersion experiences in the development of ethical cultural attitudes. Through service projects, cultural exchanges, and international study programs, students have the opportunity to interact directly with diverse communities, broaden their cultural perspectives, and deepen their understanding of global interconnectedness. The abstract emphasizes the importance of reflection and self-evaluation in the development of ethical cultural attitudes. Educators are encouraged to incorporate reflective practices into their teaching, which enable students to critically evaluate their own biases, assumptions, and cultural representations and identify areas for personal growth and development. Overall, this commentary highlights the multifaceted nature of developing ethical cultural attitudes in students and provides practical insights into methodologies and pedagogical approaches that educators can use to educate a generation of culturally competent, empathetic, and ethically responsible global citizens.

In today's globalized and interconnected world, fostering ethical cultural attitudes in students is paramount. Developing an appreciation for diversity, empathy towards others, and a sense of ethical responsibility not only enriches students' personal growth but also cultivates a more inclusive and harmonious society. This article delves into the methodology of fostering ethical cultural attitudes in students, highlighting key strategies and approaches that educators can employ to nurture these essential qualities.

Central to the development of ethical cultural attitudes is the cultivation of cultural awareness and sensitivity. Educators can integrate diverse perspectives, multicultural literature, and authentic cultural experiences into the curriculum to expose students to different worldviews and traditions. By encouraging open dialogue and challenging stereotypes, students learn to appreciate the richness of cultural diversity and develop a deeper understanding of the interconnectedness of global communities.

Empathy is a fundamental component of ethical cultural attitudes, enabling students to understand and relate to others' experiences. Through activities such as role-playing, storytelling, and guided discussions, educators can foster empathy by encouraging students to step into the shoes of individuals from diverse backgrounds.

By exploring issues from multiple perspectives, students develop a broader understanding of cultural nuances and learn to navigate complex social dynamics with compassion and sensitivity. Critical thinking and ethical reasoning are essential skills for navigating the complexities of cultural interactions and ethical dilemmas. Educators can engage students in thought-provoking discussions and case studies that prompt them to analyze cultural norms, values, and ethical principles critically. By exploring real-world scenarios and examining the implications of different courses of action, students learn to make informed ethical decisions and develop a strong moral compass grounded in empathy and respect for others. Experiential learning and immersion experiences provide invaluable opportunities for students to engage directly with diverse cultures and communities. Service-learning projects, cultural exchanges, and international study programs enable students to step out of their comfort zones, broaden their cultural perspectives, and develop meaningful connections with individuals from different backgrounds. By immersing themselves in unfamiliar environments, students gain firsthand insights into the challenges and opportunities of cultural diversity, fostering a deeper appreciation for cultural differences and a heightened sense of global citizenship.

Reflection plays a crucial role in the development of ethical cultural attitudes, allowing students to critically examine their own beliefs, biases, and cultural assumptions. Educators can incorporate reflective practices into the learning process by providing opportunities for journaling, group discussions, and self-assessment exercises. By encouraging students to evaluate their own attitudes and behaviors in light of cultural diversity, educators empower them to become more self-aware and culturally competent individuals. In conclusion, the methodology of developing ethical cultural attitudes in students encompasses a multifaceted approach that integrates cultural awareness, empathy, critical thinking, experiential learning, and reflection. By embracing these methodologies, educators can empower students to navigate the complexities of our diverse world with compassion, integrity, and respect, laying the foundation for a more inclusive and harmonious society.

We are the result of pedagogical scientific and practical analysis according to the newly introduced educational subject "Education". To include the concept of national spiritual and moral education we offer. For this, spiritual and moral culture in learners formation is appropriate. Spiritual and moral culture - traditions of the people of Uzbekistan, to know and respect the language and culture, the sense of national pride, education and intelligence, the presence of moral examples and striving to be like them in everyday life, from free time to use socially valuable methods of use knowledge, as a national asset over his personal potential grieving, etc., and it is in

various relational processes it is manifested in the process of learning, creative and labor activities. Spiritual and moral education - to introduce the young generation to the rich national cultural historical traditions of the people, customs and universal effective organizational, pedagogical form based on values and education in which tools are developed and put into practice.

Spiritual and moral education is the formation of spirituality and morality includes. Spirituality - (Arabic - a set of meanings) of people philosophical, legal, scientific, artistic, moral, religious ideas and is a set of concepts [3]. Also, spirituality is a person's internal, is the concept of mental, moral image, certain moral standards, is a way of living based on morals. Training of highly qualified specialists according to world standards in many ways to the sustainable development of higher education and it related to the training of the providing pedagogue personnel. It's own in turn, this educational process requires advanced pedagogical technologies implementation by organizing on the basis of future teachers requires improvement of national outlook. Also in this case, the educational process is a market economy organization, taking into account their requirements, training related to it the introduction of technologies, the content of education continuously improvement of methodical support aimed at updating causes the need. In training future teachers a well-rounded person in harmony with modern teaching technologies national outlook, which is considered an important component of education development and its research from a pedagogical point of view and it is relevant to bring it to a new level of quality is considered.
